ANNOUNCING A NEW SERVICE

WHAT IT IS

It is a Packet Service designed to get the new bulletins on subjects of special interest to U.S.D.A. employees to them immediately upon receipt in the library.

At the present time packets are being circulated on the following subjects:

IRRIGATION
RANGE AND PASTURE
SOILS AND FERTILIZERS
WEED CONTROL

This is your service so let us know what your subject interests are. Here are some additional suggestions:

LIVESTOCK FEEDING
THE HOME AND GARDEN
FOOD AND NUTRITION

WHAT WE DO

We check current bibliographies and bulletin lists in current periodicals and request titles pertinent to the work of the Department of Agriculture in this region.

When these bulletins are received packets are assembled. Each packet consists of six publications and is circulated on a routing slip, in the same way current periodicals are circulated, to individuals requesting the service.

The number of packets prepared on any subject is dependent upon the bulletin material available. In some cases there will be one or two packets each month, in other cases one each quarter.

FOR WHAT YOU TO SEE NEXT PAGE

WHAT YOU DO

Let us know if you wish to receive this service and the subjects you are interested in.

Read the material as soon as it comes to your desk and forward the packet to the next reader within seven days of the date of receipt.

If some of the items are of particular interest and you need them longer request these titles on loan from the library - use Library Request Form AD-245 - and we will send a copy for a regular loan period of three weeks. If you want any of the titles for your files request these from your Information Division or from the publisher - not from the library.

The important thing is to keep the packets moving so that everyone will have an opportunity to see the bulletins while they are current.

The contents of some of the packets now in circulation are listed below.

RANGE AND PASTURE PACKET

Important grasses on Montana Ranges. Mont. Agr. Exp. Sta. Bul. 470
Irrigated pasture management study for the year 1950 - Sonoma County.
Calif. Ext. Serv.
